Michelle:

Deb will have START address as return address for coolers going to labs from Dimock. You can expect about ten of each size to be shipped from the labs to your office. Beyond that amount, please make appropriate arrangements prior to site work to have coolers shipped from EPA warehouse.

Thank you,

Karen Esposito

Michelle:

I am looking into this. Also, we have various sizes.

Thank you,

Karen-

I would like to request that EPA ship approximately 15 of these excess coolers to the START office in Wheeling, for use on future sites. They could be shipped "express saver" or "ground". We would like to avoid requesting them for project work just prior to a sampling event that we may be short on coolers for, so that the shipping charges aren't excessive (i.e., overnight).

In addition, are all of the coolers the same size (large)? We'd like to have some various sizes in stock... Please let me know if this is possible, thank you.

Subject: EXCESS COOLERS AVAILABLE AT EPA WAREHOUSE

All:

This is to inform you that we have approx 50 coolers available at the EPA warehouse for use at SF Sites, with another 50 expected to be added to the warehouse soon. Please keep this in mind so we are not making unnecessary cooler purchases through START, or through any other purchase/contract vehicle. If coolers are needed, please make arrangements to obtain the coolers from EPA storage.

Thank you,

Karen Esposito  
START Project Officer
